AUGUST 2010 Edition

BEACON LIGHT ON—Dr. Arthur Cole

Dr. Arthur Cole

Dr. Arthur Cole, 80, a flying physician whose 1959 Cessna 182 has been a based-customer since

1974, graduated from Rice University with a BA and Master's and received his Doctorate from the University of Texas.

Doc, as he is called, is a volunteer to such organizations as the Houston Ground Angels, Grace Flight and Angel Flight. He has over 5500 hours of flying experience including three engine failures, one at night under IFR!

Doc and wife, Allyce, have two children, four grandchildren and two great grandchildren. Doc started in cancer research in 1951 with M.D.

Anderson. Other areas of specialization include genetics, radiation biology and molecular biology.

When asked whether or not he believed the old rumor about what happens to a male if he stands in front of an operating radar unit while on the ground, he said that it was highly unlikely there would be any adverse affect.

The Beacon Light is on Dr. Arthur Cole for August 2010!

Special points of interest:

The most effective way to do it, is to do it.

-Amelia Earhart

Unique Eye Care -Dr. Edy N. Hollenberg

A popular saying from World War II states: "A pilot's eyes are his finest weapon!" In today's advanced technological age, a pilot's eyes are still "his finest weapon".

Pilots have special eye and vision needs. Unique Eye Care plays a crucial role in ensuring pilots are provided with proper visual function efficiency. A significant percentage of pilots are over age forty and are flying with corrective eyewear, bifocals or contact lenses to function effectively. A thorough eye exam is the first step in proper aircrew eye care.

Prescribing single vision aircrew eyewear is rather straightforward; prescribing multifocal eyewear for pilots requires a much greater clinical expertise and knowledge of the cockpit environment. Accurate refraction is essential for top visual efficiency.

One of the most overlooked factors in prescribing aircrew eyewear is frame adjustment. Aviators should bring their flight gear: helmet, oxygen mask, and/or headphones, to the office for a proper personal fitting of primary and backup eyewear when flight gear is in place.

The best way to determine true working distances for an individual pilot is to measure actual cockpit working distances in the pilot's airplane with the seat adjusted to normal flight settings. It is my job to personally measure you for your new eyewear in the cockpit of your aircraft.

Unique Eye Care provides customized service and vision care with convenient "fly in" service. Dr. Edy will ensure vision at all times by providing, optimum spectacle prescription to all my aviator patients who require eyewear while flying.

Unique Eye Care is conveniently located at West Houston Airport. Come by Hangar D-2 and "See the Difference" or call 281-492-8018 today for an appointment.

A pilot's vision is truly one's finest asset.

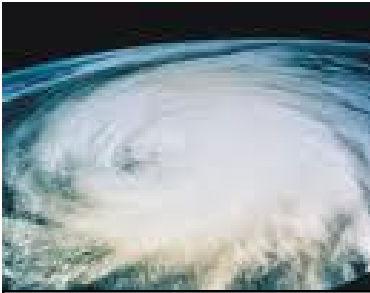

-Dr. Edy N. Hollenberg
Therapeutic Optometrist
